

Listing and Amendments to the Claims

This listing of claims will replace the claims that were published in the PCT Application:

- 1) (currently amended) Method for indicating the current status of a removable media device (4)-provided for being loaded with at least one removable medium (5), and being connected to a device (4)-for reading and/or writing AV storage media, having the steps of
 - checking the type of user input upon occurrence of user input,
 - keeping the status of the removable media device (4)-if the type of user input is not related to the removable media device (4),
 - else checking whether a characteristic feature of the at least one removable medium (5)-has changed,
 - keeping the current status if the characteristic feature of the at least one removable medium (5)-has not changed, and
 - else updating the status.
- 2) (currently amended) Method according to claim 1, wherein the characteristic feature is an identifier (~~VID~~) of the medium (5).
- 3) (currently amended) Method according to ~~one of the preceding claims~~ claim 1, wherein user input types related to the removable media device (4)-are one or more of input command to enter removable media device sub-menu, input command to navigate within a removable media device sub-menu, input command to access a removable medium (5), and input command that generally is preceding an access to a removable medium (5).
- 4) (currently amended) Method according to ~~one of the preceding claims~~ claim 1, wherein checking whether a characteristic feature of the at least one removable medium (5)-has changed is performed repeatedly in case an error status has been detected.

- 5) (currently amended) Method according to ~~one of the preceding claims~~ claim 1, wherein identifiers ~~(VID)~~ of all removable media ~~(5)~~ of a multiscard reader type media device ~~(4)~~ are checked.
- 6) (currently amended) Method according to ~~one of the preceding claims~~ claim 1, wherein, for a multiscard reader type media device ~~(4)~~ the file structure of all inserted removable media ~~(5)~~ is read and assembled to a single file structure.
- 7) (currently amended) Device ~~(1)~~ for reading and/or writing AV storage media ~~(8)~~, the device being provided with a link ~~(3)~~ for connecting a removable media device ~~(4)~~ which itself is provided for being loaded with at least one removable medium ~~(5) characterized in that~~ wherein the device is provided with a controller ~~(uP)~~ to perform the method according to ~~one of claims 1 to 6~~ claim 1.
